- The order code must be completed with the winding voltage number (50/60Hz) and the winding voltage number followed by 60 if a 60Hz unit.  
The following standard voltages are available:  
- AC 50-60Hz 024 - 048 - 110 - 230 - 400V  
- AC 60Hz 024 60 - 048 60 - 120 60 - 220 60 - 230 60 - 460 60 - 575 60 (V).
- The contactor winding is electronically controlled; it can be either AC or DC powered and has a wide operational range.  
The order code must be completed with the winding voltage number.  
The following standard voltages are available:  
- AC/DC 024 = 24...60VAC/20...60VDC; 110 = 60...130VAC/DC; 230 = 100...250VAC/DC; 400 = 250...500V.

### General characteristics

- up to 40A (1000VDC), 32A (1200VDC), 25A (1500VDC)
- modular construction
- Jumpers for connecting the poles in series supplied as standard with disconnectors GD... series
- Available versions:
  - Direct operating
  - Door coupling version. Use switch disconnector with direct actuator and separately purchase the handle and shaft extension for this version.
- Screw or 35mm DIN rail fixing
- Padlockable in 0 position with no extra accessory.

### Operational characteristics

- Rated insulation voltage for GA...D and GD...
  - Ui: 1000V (pollution degree 3)
- Rated insulation voltage for GD...
  - Ui: 1500V (pollution degree 2)
- Rated impulse withstand voltage Uimp: 8kV
- Mechanical life:
  - 100,000 cycles GA040D
  - 10,000 cycles GD...
- Degree of protection: IP20.

### Certifications and compliance

Certifications obtained: UL Listed for USA and Canada (cULus - File E93602) as Manual Motor Controllers, to UL508/CSA C22.2 n° 14 for GA040D and GAX42040D; EAC for GA...D.

Compliant with standards: IEC/EN/BS 60947-3, IEC/EN/BS 60947-1, UL60947-4-1.

### Components

Enclosure	Switch disconnector	Handle included with GAZ...
GAZ1	GD025AT2	GAX61
GAZ2	GD032AT3	GAX61
GAZ2	GD040AT4	GAX61
GAZ1B	GD025AT2	GAX61B
GAZ2B	GD032AT3	GAX61B
GAZ2B	GD040AT4	GAX61B

### General characteristics

- Enclosure material: ABS
- Possible accessories to mount afterwards, if any required:
  - GAX30 to provide shielded cable connection continuity (e.g. with static converters)
- Padlockable handles
- Sealable cover
- Tightening torque for cover screws:
  - GAZ025...: 1.3Nm/16lb.in
  - Other types: 1.5Nm/13lb.in.
- Degree of protection: IP65
- Cable entry:
  - GAZ025... types: PG16/M25 and PG13.5/M20 knockouts
  - GAZ032... and GAZ040... types: PG16/M25 and PG29/M32 knockouts.

### Certifications and compliance

Certifications obtained: EAC  
Compliant with standards: IEC/EN/BS 60947-3, IEC/EN/BS 60947-1.

SG24PA300	4P	NO	4	1	0.496
SG24PA300R	4P	YES	4	1	0.505

### General characteristics

#### SURGE PROTECTION DEVICES TYPE SG2

They are available in plug-in cartridge version and they are suitable for installation in secondary boards and in terminal equipment.

They ensure protection against overvoltages conditions.

The protection cartridges are plug-in and can be easily replaced for quick servicing.

SG2 surge arresters are immune to temporary overvoltages (TOV) and block the circulation of the subsequent network current after the intervention.

### Operational characteristics

- IEC maximum continuous operating voltage  $U_c$ : 300VAC
- IEC maximum discharge current  $I_{max}$  (8/20 $\mu$ s): 50kA per pole
- IEC rated discharge current  $I_n$  (8/20 $\mu$ s): 20kA per pole
- Versions with or without relay output having changeover contact for remote status indication
- IEC degree of protection: IP20.

### Certifications and compliance

Certification obtained: EAC.

Compliant with standards: IEC/EN/BS 61643-11.

### Characteristics

Type	IEC rated voltage $U_n$ [V]	IEC voltage protection level $U_p$ [kV] L-N	Power installation system

### General characteristics

The surge protection device type SG2EDG..., SG2DG... and SA2EDG... with plug-in cartridge for photovoltaic applications is suitable for installation on the direct-current end of a photovoltaic installation and protects against induced overvoltage conditions.

The protection cartridges are plug-in and can be easily replaced for quick servicing.

### Operational characteristics

- EN maximum continuous voltage  $U_{cnpv}$ : 600VDC, 1100VDC, 1500VDC
- EN short circuit current rating  $I_{scnpv}$ : 11kA for SG2EDG... and SG2DG..., 9kA per SA2EDG...
- Versions with or without relay output having changeover contact for remote status indication
- EN degree of protection: IP20.

- 1 Complete with coil voltage digit if 50/60Hz or with voltage digit followed by 60 if 60Hz. Standard voltages are:  
– AC 50/60Hz 024 / 048 / 110 / 230 / 400V  
– AC 60Hz 024 60 / 048 60 / 120 60 / 220 60 / 230 60 / 460 60 / 575 60 (V).
- 2 The contactor coil is controlled electronically; it can have either an AC or a DC supply and has a wide operating range.  
Complete the order code with coil voltage digit.  
Standard voltages are:  
– AC/DC 024 = 20...48V; 110 = 60...110V; 230 = 100...250V.
- 3 The contactor coil is controlled electronically; it can have either an AC or a DC supply and has a wide operating range.  
Complete the order code only with the digit of the coil voltage.  
Standard voltages are:  
– AC/DC 024 = 24...60VAC/20...60VDC; 110 = 60...130VAC/DC; 230 = 100...250VAC/DC; 400 = 250...500V.

General characteristics

The contactors are specifically made with magnetic elements in the arc extinction chambers to obtain high DC load operational capabilities. They are used to disconnect and isolate the load between the photovoltaic panel and the AC/DC inverter.  
For add-on contact blocks, accessories and spare parts, consider indications of the corresponding standard contactors without the D letter in the code.

Italian Fire Department Directives

These directives provide for a disconnecting device for all current-carrying elements, that can be operated by remote control switch, placed in an easily reached and marked position, in order to safely isolate each part of the installation within the fire system compartment including the photovoltaic (PV) generator.  
As an alternative, the PV generator must be installed, either externally of the fire system compartment or internally but in a dedicated compartment with adequate fire-resistant features. For such function, specifically designed contactors for on-load use in IEC DC1 duty up to 1000VDC are available.

Operational characteristics

❶ Complete order code with coil voltage digit or voltage digit followed by 60 if 60Hz.

Standard voltages are as follows:

– AC 50-60Hz 024 - 048 - 110 - 230 - 400V

– AC 60Hz 024 60 - 048 60 - 120 60 - 220 60 - 230 60 - 460 60 - 575 60 (V).

❷ The contactor coil is controlled electronically; it can have either an AC or a DC supply and has a wide operating range.

Complete the order code only with the digit of the coil voltage.

Standard voltages are:

– AC/DC 024 = 24...60VAC/20...60VDC; 110 = 60...130VAC/DC; 230 = 100...250VAC/DC; 400 = 250...500V.

❸ The coil of the contactor can be powered indifferently in AC or DC.

Complete the order code only with the digit of the coil voltage. Standard

voltages are:

– AC/DC 24 / 48 / 60 / 110-125 (indicate 110)

– AC/DC 24 - 48 - 60 - 110...125 (indicate 110) - 220...240 (indicate 220) - 380...415 (indicate 380) - 440...480V (indicate 440).

Example: 11B250400110 for contactor B250, four poles, without auxiliary contacts and with 110-125VAC/DC coil.

**The 24VAC/DC voltage is not possible for B500...B6301000 contactors.**

Other voltages available on request.

### General characteristics

In photovoltaic systems, contactors are used with the function of DDI (Interface Device) between the DC/AC inverter output and the line.

The Italian CEI 0-21 standard, June 2012 edition, prescribes that contactors used as DDIs must have dimensions corresponding to the AC-3 utilisation category.

The EXP1018 module will be made available only when the competent authorities have established the exact terms of the supervision and control of the specific commands (currently under study as specified in the Italian CEI 0-21 standard).

## Caratteristiche generali

PMVF... interface protection system (IP) unit has been developed according to the Italian CEI 0-21 standard prescriptions. Each is used when a local solar generating system is connected in parallel with the low-voltage electric utility. The controls refer to limits of voltage and frequency monitoring.

In the case when either the voltage or the frequency are out of admissible limits, PMVF... must step in by de-energising a relay output so that the interface device (DDI) trips.

PMVF51 is certified for use in single and three phase systems, where it is required in presence of storage systems connected in parallel to the distribution network and to the photovoltaic inverter on the AC side (presence of multiple energy generators simultaneously or exceeding the threshold of 11.08kW overall).

PMVF... is equipped with 4 inputs having the following functions:

- DDI status feedback
- External signal for frequency selection (communication network malfunction)
- Local control for frequency selection
- Remote tripping (forced DDI opening, independent of voltage and frequency values).

Also, there are two relay outputs for:

- DDI opening and closing
- Standby device opening (programmable: retentive normally energised, retentive normally de-energised or adjustable pulse).

The standby device control is compulsory in installations with more than 20kW and consists of a signal, with a 0.5s delay respect to the DDI opening command, transmitted only if the DDI failed and did not complete the disconnection.

The following functions can be handled by the programmable outputs if the PMVF20 is equipped with a EXP1003 expansion module, or PMVF51 with EXM1001:

- Programmable alarm
- Autonomous signalling in case of phase power unbalance (LSP), only if three CTs are also installed.

## Operational characteristics

- Auxiliary voltage:
  - PMVF20: 100...400VAC/110...250VDC
  - PMVF20D048: 12...48VDC
  - PMVF51: 100...400VAC/110...250VDC

<b>EXP1018</b>	IEC/EN/BS 61850 interface

### Standby device opening

In installations with more than 400kW, the standard specifies there must be a command signal, that releases another standby device, given within 1 second whenever the DDI opening fails or malfunctions.

### Automatic DDI reclosing

Whenever an automatic circuit breaker is used as the DDI, the PMVF30 is capable of controlling both the opening (according to the installation conditions indicated in the Italian CEI 0-16 standard) and the auto reclosing. The auto reclosing function includes defining the number of attempts and the time interval between an attempt and the following one as well as generating an alarm if the closing operation does not take place.

This function can be carried out through a programmable output of the PMVF30 (unless it is already used for the standby device operation) or by installing an EXP1003 expansion module.

### General characteristics

PMVF30 interface protection system (IP) unit has been developed according to the Italian CEI 0-16 standard prescriptions. It is used when a local generating system is connected in parallel with the medium-voltage utility distribution grid. The controls refer to limits of voltage and frequency monitoring.  
In the case when either the voltage or the frequency are out of admissible limits, PMVF... must step in by de-energising a relay output so that the interface device (DDI) trips.  
PMVF30 is equipped with inputs having the following functions:

- DDI status feedback
  - Interface protection system exclusion
  - Local control
  - Remote tripping (forced DDI opening, independent of voltage and frequency values).
- In addition, there are two relay outputs to configure as:
- DDI opening
  - Programmable (either as factory default for standby device opening or to set up as auto reclosing if the DDI is an automatic circuit breaker).

### Operational characteristics

- Auxiliary voltage:
  - PMVF30: 100...400VAC/110...250VDC
  - PMVF30D048: 12...48VDC
- Voltage inputs (connection via VTs in MV or directly in LV end):
  - Primary: until 150,000V
  - Secondary: 50...500V (for voltage/frequency); 50...150V (for residual voltage measurement)
- Relay outputs 5A 250VAC AC1 / 5A 30VDC
- 4 digital inputs
- 3 current inputs (for optional measuring): Use via CTs with selectable /5A or /1A secondary
- Parameter configuration and remote control (only with communication expansion module) with software **Synergy and Xpress**
- Housing: Flush mount 96x96mm/3.78x3.78"
- Degree of protection: IP65 on front; IP20 on terminals
- **Predisposed for IEC/EN/BS 61850 signal supervision using expansion or external module.**

### Reference standards

Compliant with standards: Italian CEI 0-16;  
IEC/EN/BS 60255-27, IEC/EN/BS 61010-1,  
IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-3.

## Remote control and monitoring GSM modem via SMS

Compliant with Italian CEI 0-16 Standard, paragraph 8.8.6.5 and annex M, resolution 421/2014 of the ARERA

EXCGSM01

Order code	Description	Qty per pkg	Wt
		n°	[kg]

GSM Modem (modular - 4U).  
IP69K outside aerial with 2.5m cable.  
RJ45-USB programming cable (included).

<b>EXCGSM01</b>	100...240VAC, 1 digital input, 1 analogic input (0...10V, 0...20mA, NTC), 1 relay output, SMS send/receive for remote control and alarm signals	1	0.340
-----------------	---	---	-------

### Use with CEI 0-16

The CEI 0-16 standard in paragraph 8.8.6.5 and in attachment M prescribes that the electricity production plants powered by wind or solar photovoltaic sources with power greater than or equal to 100kW, connected or to be connected to medium voltage grids, are equipped with GSM modem.  
Thanks to this modem it is possible to manage the disconnection of the generation through the messages sent by the energy distributor.

### AERIAL

- Quad band 850/900/1800/1900MHz
- Degree of protection: outside IP69K
- 2.5m cable
- Fixing via M10 hole:
  - with adhesive seal
  - with threaded pin and nut.

### General characteristics

With EXCGSM01 it is possible to remotely operate a relay output and obtain information on the system by sending programmable SMS.

Using the configuration software (downloaded for free from [www.LovatoElectric.com](http://www.LovatoElectric.com)) the user can control the relay output and both the digital and analog inputs.

The logic is based on events (for example, the activation of the digital input or the arrival of an SMS with specific text), to which the user can decide specific actions (reply either by SMS or voice message, or by switching the relay output).

### Reference standards

Compliant with electrical safety standards: EN/BS 62368, EN/BS 62311.

**● IEC/EN/BS 61850 protocol**

The EXP1018 module will be made available only when the competent authorities have established the exact terms of the supervision and control of the specific commands.

**General characteristics**

PMVF... interface protection system (IP) units have been developed in order to be used when a local generating system is connected in parallel with the utility distribution grid. The controls refer to limits of voltage and frequency monitoring.

In the case when either the voltage or the frequency are out of admissible limits, the PI must step in by de-energising a relay output so that the interface device (IS) trips.

PMVF... is equipped with 4 inputs having the following functions:

- IS status feedback
- R.O.C.O.F./Vector shift delay or external signal for frequency selection (communication network malfunction)
- Disabling signal
- Remote tripping (forced IS opening, independent of voltage and frequency values).

Also, there are two relay outputs for:

- IS opening and closing
- Standby device opening (programmable: retentive normally energised, retentive normally de-energised or adjustable pulse).

The backup device consists of a signal contemporary or delayed respect to the IS opening command, transmitted only if the IS failed and did not complete the disconnection. PMVF... also has two additional relay outputs (EXM1001) to configure as:

- Programmable alarm
- Autonomous signalling in case of phase power unbalance (LSP), only if three CTs are also installed.

**Operational characteristics**

- Auxiliary voltage: 100...240VAC/110...250VDC
- Voltage inputs: max 400VAC
- Relay outputs 5A 250VAC AC1 / 5A 30VDC
- 4 digital inputs
- Current inputs (optional): use via CTs with selectable /5A or /1A secondary
- Support of EXM series communications ports (USB, RS232, RS485, Ethernet) see section 31
- Parameter configuration and remote control (only with communication expansion module) with software **Synergy** and **Xpress**
- Modular housing (6 modules)
- Mounting on 35mm DIN rail (IEC/EN/BS 60715) or screw fixing via pull out tabs
- Degree of protection for both: IP40 on front; IP20 on terminals

**Reference standards**

Compliant with standards: DEWA DRRG (PMVF60); SEC (PMVF60); ENA G59-3/G99 (PMVF70); VDE-AR-N 4105, VDE V 0126-1-1 (PMVF80); IEC/EN/BS 60255-27; IEC/EN/BS 61010-1, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-4.

Backup power supply for  
interface protection unit

PMVFUPS01

Order code	Description	Qty per pkg	Wt
Backup power supply for interface protection unit PMVF...			
PMVFUPS01	Input 230VAC. Output 230VAC with stored energy 200Ws and power 250VA	1	0.500

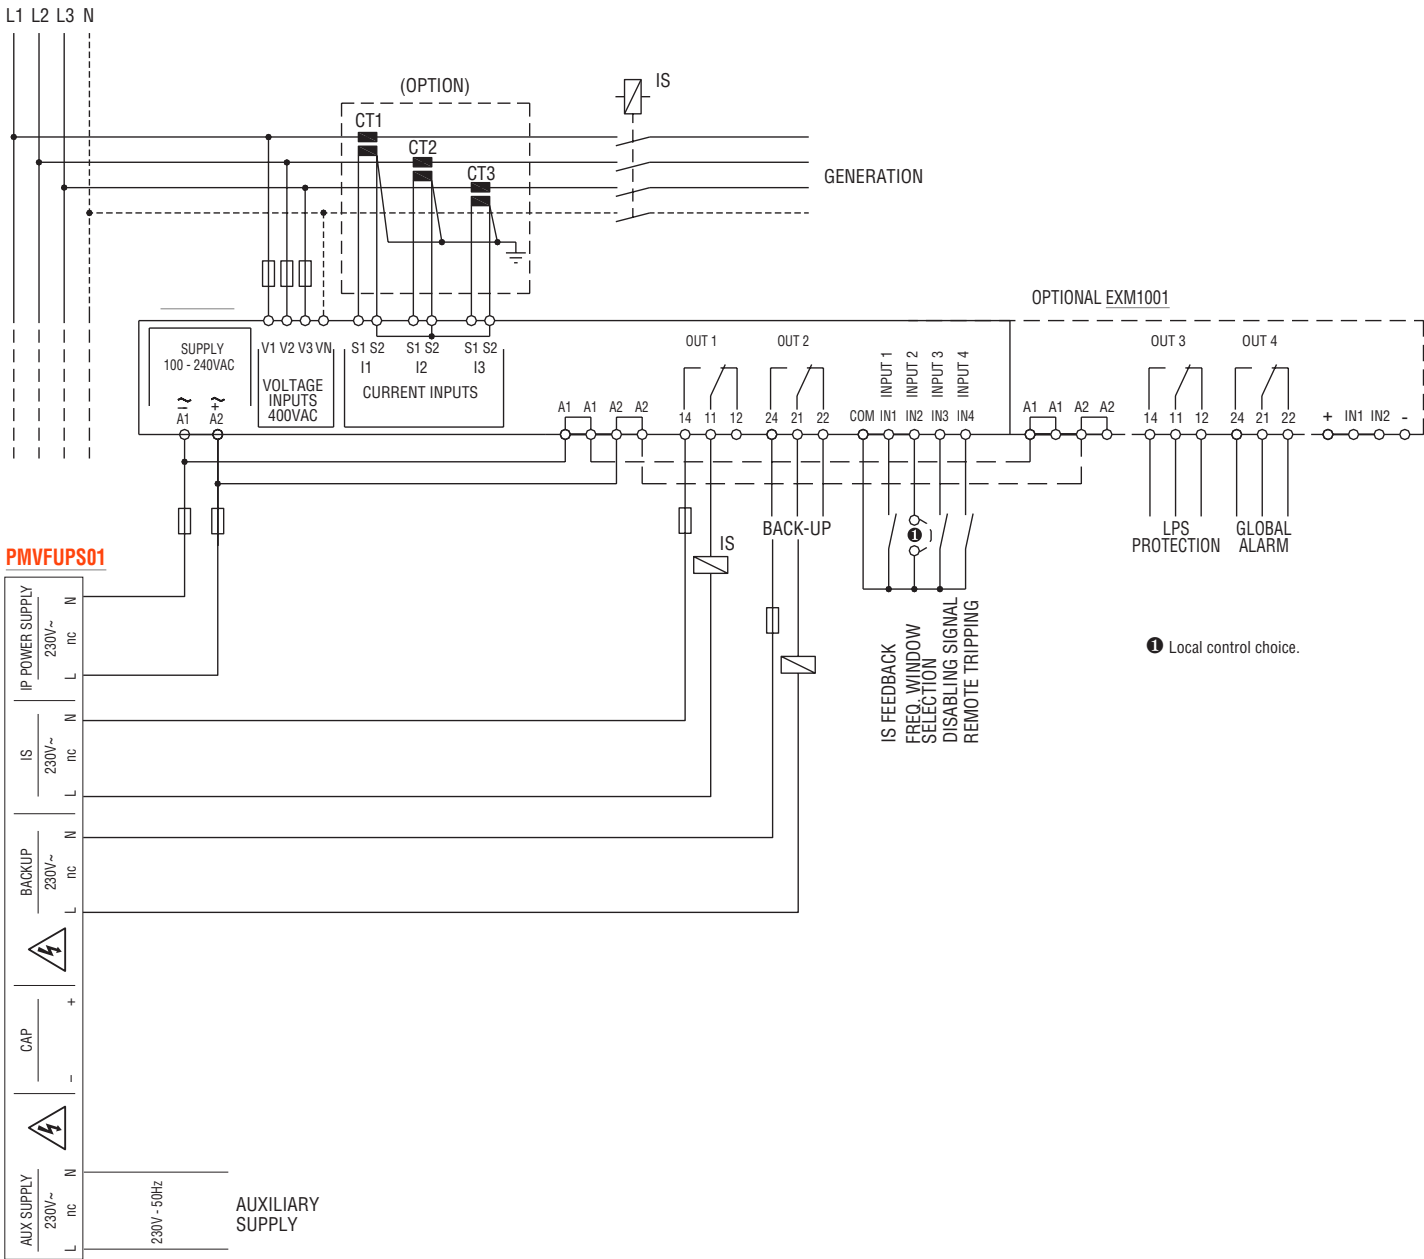

**General characteristics**  
CEI 0-21 and CEI 0-16 standards require an auxiliary power supply to feed the interface protection (IP), the interface switch (IS) and the backup switch for at least 5 seconds in the event of a power failure. PMVFUPS01 guarantees the necessary energy by accumulating it in capacitors, thus avoiding the use of batteries that require maintenance.

- Operational characteristics**
- Power supply: 230VAC, 50Hz
  - Output voltage: 230VAC, 50Hz
  - Output power: 250VA
  - Accumulated energy: 200Ws
  - Accumulation time: 15s
  - 9U modular housing
  - Operating temperature: -5...+ 55°C
  - Degree of protection IP20.

**Reference standards**  
Compliant with standards: IEC/EN/BS 61010-1.

## Miniature circuit breakers 1...63A

### 1P, 2P, 3P and 4P - 10kA (IEC/EN/BS)

P1MB4PC...

Order code	Curve	IEC In	IEC Icn	Mod. DIN	Qty per pkg	Wt
		[A]	[kA]	n°	n°	[kg]
Miniature circuit breakers – 2P – C-curve characteristic.						
P1MB2PC16	C	16	10	2	6	0.230
P1MB2PC20	C	20	10	2	6	0.230
P1MB2PC25	C	25	10	2	6	0.230
P1MB2PC32	C	32	10	2	6	0.230
P1MB2PC40	C	40	10	2	6	0.230
Miniature circuit breakers – 4P – C-curve characteristic.						
P1MB4PC20	C	20	10	4	3	0.460
P1MB4PC25	C	25	10	4	3	0.460
P1MB4PC32	C	32	10	4	3	0.460
P1MB4PC40	C	40	10	4	3	0.460
P1MB4PC50	C	50	10	4	3	0.460
P1MB4PC63	C	63	10	4	3	0.460

### General characteristics

These devices are used to protect against short circuits and overloads of wiring installations and loads in panel boards, office buildings, stores and similar applications.

Their purpose is circuit protection, circuit isolation and load operation controls. They have characteristics of instantaneous trip defined as follows:

- C-curve: instantaneous trip 5...10 times  $I_n$  for inductive loads (mixed loads, resistive and inductive with low inrush current)

Main features include:

- IEC rated current  $I_n$ : 1...63A
- Pole width: 17.5mm / 0.69"
- Contact status with flag indicator
- Trip characteristic: curve type B, C and D
- Auxiliary contacts and trip releases mounted on left side
- Fixing on 35mm DIN rail (IEC/EN/BS 60715).

### Operational characteristics

- Dissipation per pole: 3...13W
- IEC rated insulation voltage  $U_i$ : 440V
- IEC rated impulse voltage  $U_{imp}$ : 4kV
- IEC rated operational voltage  $U_e$ : 230/400VAC
- UL 1077 rated operational voltage: 480VAC
- Short circuit breaking capacity: IEC/EN/BS 10kA - UL 7.5kA 480V.

### Certifications and compliance

Certifications obtained: cURus (E369585); EAC; TÜV-Rheinland. Compliant with standards: IEC/EN/BS 60898-1, IEC/EN/BS 60947-2, UL 1077, CSA C22.2 n°235.

## Miniature circuit breakers 80...125A

P2MB4PC...

Order code	Curve	IEC In	IEC Icn	Mod. DIN	Qty per pkg	Wt
		[A]	[kA]	n°	n°	[kg]
Miniature circuit breakers – 4P – C-curve characteristic.						
P2MB4PC080	C	80	10	6	2	0.680
P2MB4PC100	C	100	10	6	2	0.680
P2MB4PC125	C	125	10	6	2	0.680

### General characteristics

- IEC rated current  $I_n$ : 80...125A
- Pole width: 27mm / 1.06"
- Contact status with flag indicator
- Trip characteristic: curve type C and D
- Fixing on 35mm DIN rail (IEC/EN/BS 60715).

### Operational characteristics

- Dissipation per pole: 15...20W
- IEC rated insulation voltage  $U_i$ : 400V
- IEC rated impulse voltage  $U_{imp}$ : 4kV
- IEC rated operational voltage  $U_e$ : 230/400VAC (230VAC 1P version)
- Short circuit breaking capacity: IEC/EN/BS 10kA - UL 5kA 240V (1P) - 5kA 480V (2-3-4P).

### Certifications and compliance

Certifications obtained: cURus (E369585); EAC; TÜV-Rheinland. Compliant with standards: IEC/EN/BS 60898-1, IEC/EN/BS 60947-2, UL 1077, CSA C22.2 n°235.

## Residual current operated circuit breakers 1P+N - 10kA

P1RE1NC...

Order code	Curve	IEC In	IEC Icn	IEC IΔn	Mod. DIN	Qty per pkg	Wt
		[A]	[kA]	[mA]	n°	n°	[kg]

P1RE1NC40AC030	C	40	10	30	2	1	0.205
P1RE1NC40AC300	C	40	10	300	2	1	0.205

### General characteristics

These RCCBs are intended for the protection of people against indirect contact (electric shock) and of installations against fire hazards due to a persistent earth/ground fault current. They also protect against short circuit and overcurrent.

From a practical point of view, they integrate both functions of MCB and of RCCB.

Its main features are:

- IEC rated current  $I_n$ : 6...40A
- Version: 1P+N
- Contact status with flag indicator
- Double control lever to distinguish the residual current tripping from short circuit or overcurrent tripping
- Trip characteristic: curve type C
- Fixing on 35mm DIN rail (IEC/EN/BS 60715).

### Operational characteristics

- Dissipation per pole: 3...13W
- Rated insulation voltage  $U_i$ : 400V
- Rated impulse voltage  $U_{imp}$ : 4kV
- Operating frequency: 50/60Hz
- Rated operational voltage  $U_e$ : 230VAC
- Rated residual operating voltage  $I_{Δn}$ : 30mA; 300mA
- IEC short-circuit breaking capacity  $I_{cn}$ : 10kA

### Certifications and compliance

Certifications obtained: TÜV Rheinland, EAC. Compliant with standards: IEC/EN/BS 61009-1, IEC/EN/BS 61009-2-1.

## Single-phase direct connection energy meters
